About the Conference

The International Conference on Oil & Gas for Energy Security (ICOGES-2024) is a two-day conference that aims to facilitate the convergence of academicians, policymakers, regulators, innovators, oil and gas corporations, infrastructure firms, technology providers, industry experts, and investors. The event will serve as a platform for these diverse stakeholders to share their insights, offer stimulus, and contribute to the discourse around the energy security mission, which attests to India's intent to access affordable energy sources for a nation's economic stability and overall well-being.

About the University

Pandit Deendayal Energy University (PDEU) was initiated as Pandit Deendayal Petroleum University (PDPU) to cater to the booming energy sector of the country.

Today, PDEU offers multiple courses ranging from engineering, liberal arts, and management along with maximum exposure and opportunities to its students through various national and International programs with various organizations

About the Department

The School of Energy Technology (SoET) was a constituent school of the PDEU established as School of Petroleum Technology (SPT) in 2007. The Department of Petroleum Engineering under the umbrella of SoET has served as the prominent department of PDEU offering a high-quality academic curriculum in the field of Petroleum Engineering.

The robust collaborations with regional government entities, research institutions, and enterprises provide extensive prospects for its students, researchers, and academics to engage in high-quality research, thereby facilitating their professional development and advancement.

The department offers four-year UG (B.Tech), a two-year Masters program (M.Tech), and Ph.D programs in several interdisciplinary research fields.

Objectives

- To create awareness for the energy mix to have sustainable future growth.
- To amalgamate industry-academia-policy think tanks for constructive and collaborative inputs to secure energy demands.
- To sustain the growing energy demand while maintaining the carbon footprint.
- To identify the research areas and develop an integrated solution approach.
- To demonstrate and contribute to the development of alternate energy sources.
